12:00	Lunch
12:45	Modeling application
1:45	Summary and next steps
2:00	Adjourn

## **Workshop goals**

The research team will present the current project status, preliminary findings, and an overview of the modeling tool. Our goal is to foster a discussion about the applicability and usability of this project to your work. We would also like to gather suggestions and feedback about the modeling tool and recommendations for future sampling sites in order to improve the project's relevance and usefulness.
